transcript to 73min mp3 of The Predators vs. the People” Book Review & Analysis by thefreedomarticles rumble – Parts 1 to 7
<https://rumble.com/user/TheFreedomArticles>

Welcome truth seekers and freedom lovers. This is Makiya Freeman with the Freedom articles. And in this multi video series, I'm gonna take a look at an amazing book that was just released. It's called The Predators Versus the People, and it's by a Dutch author. And hopefully, I don't butcher his name.

By. He just for short. He's really put out an amazing book here. I I highly recommend it. I'm gonna devote the next few videos to covering this, the main themes of it, and add in my own commentary and analysis.

But I I don't want that to dissuade people from reading the book. It's really it's really worth reading it. Even if you're a seasoned conspiracy researcher, it will open your eyes to new things. The way that he has framed the last 500 years of human history is excellent for its clarity of thought. He's really distilled down the the essence of what's been happening in the last 500 years and made it very clear and simple, backed up with a lot of evidence.

So, before we get into it, I wanna say that, in all fairness, David Icke has been writing about these things since 19 nineties. Now Meese picks up the story in the year 15/22 for certain reasons, but there is there is much more backstory to this if you want it. For those interested, you can check out the work of Bill Cooper, especially his Mystery School series. David Icke, you could just especially look at his book, The Biggest Secret, which was released in 1999. And then I've done videos just in the last few months that that really relate to all of this stuff.

All all links are gonna be in the show notes below, but I would check out the Havara agreement and then the Zionist Nazi collaboration. I would look at the 2 part series I did here at the top. They're all on the same side. What if east versus west was the same false dichotomy as left versus right? That's very relevant to all of this.

Elevate the east, degrade the west, the direction of the new world order. Then I did a 2 part series of dark force that caused world war 1 and world war 2 and is aiming for world war 3. And finally, Russia is not anti new world order. These are all really good, videos to give you the context of all of this, but let's dive into it. So basically, this story focuses on how a a secret network or cabal which Mies calls the glafia.

That's his word. It's it's a portmanteau. It means it's it's taken from global mafia. He he uses the word glafia. But a lot of people have have come up with their own names for this group of, the the satanic banking evil cabal that wants to take over the world and literally create a new world order, a one world dictatorship.

That's just his word for it. But he talks about how how they did it exactly, and it was through the use of usury and the control of private banking with a fractional reserve system. And they also used, menticide, which is an English word not often used. But basically, that means the the brainwashing of the mind, propaganda, mass mind control, mind colonization, that kind of idea. So he he he really lays out exactly how they did this.

Now, the word usury has been deliberately airbrushed from our history, and it's it's actually been airbrushed from science, politics, education, even our vocab and literature. Yet so many wars have been fought fought over this. And and this is why usury was banned in many countries and religions. It was banned in Catholicism. It was banned in Islam, and it was banned in Judaism, but only, with a caveat.

That was that it was allowed for Jews to use it against non Jews, but not against fellow Jews. So what is usury exactly? Well, it's the charging of money with interest. And you know, this is why so many aware politicians and statements, statesmen, and some American examples would be Thomas Jefferson, Andrew Jackson, have warned that would spell the end of an of the nation if the American people were to allow private central banking. So let's jump into this now and see.

I'm just gonna go through different quotes that I've done from this. First one here on usury. In this example as in the real world, each year, the usury cause money scarcity gets worse. So new loans are needed to keep the system afloat only to create more complications including poverty, bankruptcy and suicide. Yeah.

So the whole the whole way that usury operates is that there is only a certain amount of money. And then when, it only gets created through loans, so it gets borrowed into existence. Then when it gets paid back, interest has to be paid on it. But that interest has to come from somewhere else. And so the interest is always accumulating in the bankers' coffers.

And slowly, they're basically sucking all of the money that ever got created back into their, accounts. And so it's mathematically impossible for for it to be any other way. Like, they they are basically going to get all the money in the end. It is a crazy system that makes no sense. And makes a very good point here.

Only a fundamental monetary reform can remove this old and still insurmountable obstacle. Yet strangely enough, this basic and easy to understand fact is never addressed by all those many supposedly good hearted people, politicians, including all socialists and Marxists, philanthropists, professors, educators, NGOs, journalists, governments, institutions, think tanks, foundations who so glowingly and religiously promote sustainable development. And

also with this new supposedly benevolent multipolar world order, this will not change. Yeah. I've covered before in my videos The multipolar world order is just a nice new buzzword buzz phrase for the new world order plan, and you can bet that they're gonna be using the same usurious money private banking system.

That's not gonna change, and that's the basis for the control that we're under. We really have to grasp this. There's one more quote on usury I'm going to give you here. This is more about, actually democracies. French historian, Francois Fourey, in his book, *Pencet La Revolution Francaise* concluded much later.

Modern democracy is based on a hidden oligarchy, which is contrary to its principles but indispensable to its functioning. In plain English, modern democracy is based on a big lie. So you'll find the theme that we're about to dive into this is that the banking cartel, this glafia set up governments to their liking that would basically allow them to continue this money making scheme of usury. That was the only reason they did it. And they had such power.

They were able to do that. And so when it was convenient for them to have oligarchies or aristocracies or monarchies, that's what they did. When it was convenient for them to have democracies, that's what they did. So modern democracy is not some, unfortunately, it's not some evolution of humanity towards freedom as we might like to hope and think. There there might be a part of it at that, but it's not the full story.

It's basically a cover for, allowing them to do this whole scheme and make it look like it's, approved by the people and make it look like everything's free and open and fair. Very important point. So basically, we're picking the story up in the year 1522. So, why that year? Well, he starts that year because that's when, this this, scheme really started to gain traction.

Now let me jump in with this quote. For 1000 of years, the powerful didn't have the technological means needed for a global domination project. Although some big attempts were made by Babylon to the Phoenicians, the Greeks, the Romans, the Mongols and others in Asia and the Americas. About 500 years ago, the technologies needed for a global control project became gradually available into oceanic transportation, weaponry, the printing press, and finally banking to remote control the upcoming European and other nation states. Around 15/22, a plan for global nomination started to take form.

Glaufia decided it wanted to own and run the whole planet, humans included, as one private corporation, sometimes called farm Earth. At the time, many territories were still undiscovered, so the world had to be explored and then colonized. Glatfia solved this enormous task by making emerging European states their proxies under the guise of sovereign nation states. In each, Latvia's expertise in mobile capital were fused with the machinery of state creating covertly corporate states, fascist states if we follow Mussolini's

definition. So that's how that's why we're picking the story up here because this is when, they started to get, the technology to build these ships that could journey from continent to continent.

They had, better weapons by at that point and they had the printing press. And so finally, it was it was, like, enough for them to start exporting this around the world. Alright. So then we're gonna jump to, page 39 because some people ask, well, why Europe? Like, how come this thing started in Europe?

Nowhere, except in Europe, did these elements of capitalism coalesce into powerful mix that propelled European states toward the territorial conquest of the world and the formation of an all powerful and truly global capitalist world economy. From this perspective, the really important transition is not that from feudalism to capitalism, but from scattered to concentrated capitalist power. And the most important aspect of this much neglected transition is the unique fusion of state and capital which was realized nowhere more favorably for capitalism than in Europe. In plain English, concentrated capitalist power means a private banking and corporate system in the hands of a few very powerful people here called Glaphia, which would soon become a large global monopoly with which the nation states were to be controlled to a high degree, at first on the European states, by now all of them. By pooling an on an ever bigger scale, ever bigger global projects could be financed, like the number 1, discovery of the unknown and colonization of the great revolutions and later also number 3, spectacular industrial, infrastructural, scientific and technological developments.

Through these activities, apparently sovereign but highly dependent on bankers' capital, states were built in compliance with the wishes of the ever growing criminal banking system. Very powerful, important, paragraphs there showing that it is really this capital power which has been driving the innovation, driving the technology, driving the investments to do certain things, to build ships, to colonize, to create new areas, all of this. It comes from from this driving force. Because once they had set up their usury banking system and started to accumulate money and started to basically control the money supply, they could then direct these kind of things. And so this is this is where it kind of took off.

And all all of the things we see in the outer world, like the creation of countries and their governmental systems, is influenced, if not outright controlled by this this group and, this this monetary system. So we're gonna stop here in part 1. And in part 2, we're gonna, pick up with the 5 stages of the transfer of power. Welcome back. This is Makiya with the Freedom articles.

This is part 2 of a multivideo series on the predators versus the people, book review, commentary and analysis. And we are now gonna be talking about the 5 stages of power. Well, there may be more than 5, but we're in the 5th stage. So basically, as, Mees, the author

of this book, picked up the thread in the year 15/22, and he talks about how we have the first threat of power, which is the city states of Genoa and Venice. And then the second thread talks about Spain, Portugal, and the Jews.

The 3rd thread is Holland and USA. It's kind of together. The 4th stage of the transfer of power is the USA, and we are now living through the 5th stage where power is transferred being transferred from the west, from the USA to the east, Russia, China. So how did this all begin? So let's let's talk about this.

Here's a good quote we're gonna start with. According to Arrigi 1994, the world capitalist system developed in 4 cycles led by respectively the Genoese and Spain, the Dutch, the British and the United States. Each cycle was divided into 3 phases: a merchant or accumulation phase, a phase of industrial expansion but not in Genoa, and finally, a period of financialization dominated by the banking sector. The early merchants turned into bankers. So history goes through cycles, and these are the cycles that have happened.

But the bankers have been the ones that have been behind it all. The grand story initiated by Genoa and Venice is about an impressive 500 year old private project for world domination. It would be a brilliant and epic story, yet the main actors aren't compassionate heroes striving to save the planet and its inhabitants, but sociopathic villains who use any criminal means to attain their end of total total domination of the globe and its inhabitants. Wars, genocide revolutions, financial control, ecological crises, theft, extortion, bribery, blackmail, murder, social and geoengineering, perversion of religion, falsification of science, the mendacity in the mass media, etcetera. Their covert methods are so deceptive that even today, while informed and well educated people, still believe that a conspiracy at a global level is impossible.

The eye sees only what the mind is prepared to comprehend. The usual reasoning in the free West is that our honest media and our independent scientists and our democratic watchdogs would have discovered such a project long ago and blown the whistle, while our democratic governments would have joined quickly to stop their tyranny. Due to the astoundingly sophisticated yet criminal achievements of the perpetrators acting as a global mafia, we named them GLAFIA. Initially, the Glafia project was woven with just 2 threads, 1 with Venetian Genoese, this section, and one of the ex Spanish and Portuguese Jewish merchants and bankers, section a 2.2. Over the course of 5 centuries, many other threads were spun or picked up and interwoven.

Some were dropped like the Soviet Union. As we will soon see, today, all countries, all big corporations and all important national and international institutions are part of the fabric of the GLAFLIA project. So this is the background to to all this. So let's begin with Genoa and Venice. So how how did they become the first threat in the first part of this whole story?

How had little Genoa become involved in the great Spanish Empire? In the 9th century, Genoa was still a small Mediterranean town with a slowly growing merchant fleet. From the 13th century on, the rich long distance trade bloomed, bullion, Asian luxury products, slaves, and multicolor. Thus, the skillful merchants of Genoa now with large fleets and colonies in the Mediterranean and the Black Sea were able to accumulate huge capitals which allowed them to become bankers. In the 14th century, the long distance trading conditions became more and more difficult for Genoa due to increasing Venetian and Turkish power and competition.

The rich Genoese bankers then looked west for opportunities to invest their idle capital and found a destination in nearby Eastern Spain. When a banking crisis hit Barcelona in 1380s, they promptly seized the opportunity to become the most important financiers in the Iberian region, which gradually included Spain's central Castile province and Portugal. That prepared their future participation in the lucrative trade between Seville and Castile's colonial empire. During the 16th century, these Genoese bankers became the most powerful class in Europe. Remember, it were Genoese Jewish bankers who financed Columbus's voyage from Seville.

Alright. And then over onto the next page. In 1508, the League of Cambrai was formed, the 1st military coalition in Europe with the goal to terminate the Venetian Republic for once and for all. France, Spain, England, and the Holy Roman Empire, roughly Germany, Austria, Switzerland, joined with the pope and attacked and destroyed, almost destroyed Venice in 1512. It only escaped because it was able to bribe the pope into leaving the coalition.

And you can see that by by this point, the Genoese and especially the Venetians had developed a real bad reputation because people were starting to catch on to what they were doing, and they didn't like it at all. No one likes to be ripped off, and the usury was allowing them to accumulate money and rip people off. And people didn't like it. Among the human beings, the Venetians are the least just and least capable of humanity. They are hypocrites.

They wish to appear as Christians before the world, but in reality, they never think of God. And except for the state which they regard as deity, they hold nothing sacred, nothing holy. All law and right may be violated for the sake of power. Yeah. So that's describing the psychopathic mindset, which is the mindset which is running this particular group, this glauflia group, this network.

And so they basically take taken over. They set up their base in Venice, especially in Genoa. But at this point, they people were catching on to their schemes and they were even being attacked by armies. And so they had to escape. And so this leads us now to the second thread of of what did they do.

Well, this is where the, Sephardic Jews come in from Iberia, from Spain, and they they're an important part of the story as well. So let's pick that up. Here, I have this highlighted. The Jews began to be seen as a danger and were expelled from Spain in 14/92 and Portugal in 14/96. Columbus, whose voyage under the Spanish charter was financed by Converso Jews, some from Genoa.

So basically, the Jews were also now when I say Jews, it's very important to make this clear. We're not talking about all Jews. We're talking about just a certain part that had, caught on to the the power of this usury, this private banking system, and they were using it and starting to accumulate capital. So they were joining up with the Genoese and the Venetians, and they were all they were all in on the scam. And and they were they were basically figuring out where they could get away with this, how they could, operate and not get kicked out of wherever they were operating.

And not as as as is ridiculously lame, not kicked out because people were anti semitic, but kicked out because they were ripping people off. They were accumulating wealth through this fraudulent, system of fractional reserve banking. And, you know, we're gonna understand that we're living in a huge age of ignorance where most people don't even understand this. But back in the past, people did understand it. And this was reason enough for people to kick out certain classes of society because they didn't want this banking system and even to cause for war, casus belli.

So let's go on now to this page. A series of wars between Genoa and Venice led to the Treaty of Turin in 13/81 and a de facto merger of Venice and Genoa. When at the start of 16th century, a small group of Venetian oligarchs decided to change their base to the Atlantic coast of Europe, they very well understood that a capitalist world system was developing and that they could eventually lead it partly due to the weaknesses of Spain. The fact that they sent an envoy, Francesco Zorzi to the English court as early as 15/29 who built up an important party of followers, the nucleus of the modern Venetian party in England, the Whigs, is a clear indication of their interest to penetrate the cabinets. Right?

So this was obviously some of the reason why they were, moving. They were they were trying to find the best place to operate their scheme. The Venetians already had a long standing working relationship with their Jews from the 16th century where the major brokers of bills of exchange in the Venetian Empire. The Venetians, while running a successful empire, controlled the flows of 1,000,000,000, silver and gold on a European level. Both had extensive international networks, not only for trade but also for intelligence.

Both were extremely ambitious and the Jews naturally wanted to take revenge on Spain where they had gained and then lost their wealthy positions through substantial control over finances, academia, the church, and government. They were now eagerly looking for new opportunities. Naturally, the Venetians and Jews joined forces, although the evidence is circumstantial. So I'm leaving a lot out here because this is just meant to be a quick summary

and not a substitute for reading the book. But basically, these these forces of the Venetians, the Genoese and the Jews, the banking Jews were the reason why these nations became powerful.

And, they were also funding the exploration of the New World with Columbus. And by the way, that was not something where he was going off in hope of finding a new continent. He he knew full well that, he was gonna be landing in the Americas. Maps were given to him. There's at least, the evidence of the Piri race map, which shows that, and that also has a outline, very accurate outline of the Antarctica under the ice.

So obviously, the you know, Meese doesn't get into it in his book here, but there was a brotherhood, mystery schools that went way back thousands of years, and they they knew all of this. They knew, where the other continents were. They had explored the world. And so, Columbus was basically being given the secret knowledge. It was kept from the public, and he knew exactly where he was going and what what his, job was to do in the Americas to start the colonization.

So, this was the second thread. The the Sephardic Jews from Iberia from Spain, we're gonna stop the story here. And basically, the next section is gonna look at the 3rd thread, which is moving north up to the Protestant lands of Holland and England. Welcome. This is Makiya, and this is part 3 of the multi video series, The Predators Versus the People, a book review, commentary and analysis.

So in the first two parts, we were looking at, the, especially in the second part, the second thread where the city states of Genoa and Venice had come together with private banking. The Jews, especially from Iberia or Spain, had joined in. Now we're up to the point where they decide that Spain and Portugal aren't really good home bases for where they wanna be, and so they start going north. So we're gonna start with this quote. The 15th 16th century marked the transition from feudalism to capitalism in Europe.

In feudalism, there were 2 often competing power centers, the Catholic church and the aristocracy. Merchants and money lenders existed but had little or no political power. By contrast, in Italian city states like Genoa and Venice, which called themselves republics, a new elite of capitalist oligarchs, merchants and bankers, was holding the most political and economic power. During their global domination project, Glatfia would gradually outsmart and incorporate both the Catholic church and the old European aristocracy. All right.

So how did they do that? So we're going to start to see what they did. They realized that they needed a certain kind of, I guess, you could say political structure or country or basically environment to to thrive with this. And the Catholic church was opposed to usury, and the aristocracy wasn't really on board, wasn't really kind of conducive to what they wanted to do for whatever reason. So he talks about how the the Spanish empire faded and Amsterdam was actually able to beat them.

And it was like a David versus Goliath fight. And so why was this? Well, his theory with some evidence is that it was the bankers that were behind Amsterdam and the Netherlands that helped to beat Spain. The official narrative of history has no good explanation for this improbable outcome, in which tiny Amsterdam defeated the great Spanish Habsburg Empire like David smashed Goliath. Around 15/22, Spain was the prime candidate for a world empire.

But as a monarchist, feudal, and traditional Catholic power, it would have been an empire on a tributary basis, a system of taxes as the church did not permit usury. Yet Glaphia's new moneyed merchant and banking elites wanted a world empire on a capitalist basis, one without negative interference by the church or aristocrats and without restrictions on usury where they could invest and withdraw their mobile capital when and where they wanted and bend all states to their wishes. Today, 500 years later, we find ourselves in the endgame of that plan. And here's a quote from Karl Marx who actually knew a lot of what was going on even though he only wrote about something that was kind of a superficial ideological battle. With the national debt arose international credit system.

Thus, the villainies of the Venetian thieving system formed one of the secret bases of the capital wealth of Holland to whom Venice and her decadence lent large sums of money. So so was it with Holland and England. By the beginning of the 18th century, Holland had ceased to be the nation preponderant in commerce and industry. One of its main lines of business therefore became the lending out of enormous amounts of capital, especially to its great rival England. And the same thing is going on today, 180 years when he wrote this between England and the United States.

So this is a, kind of a prediction of what's to come when we get to the next thread. But basically, Karl Marx is giving a kind of the game plan away here by saying that this is what happened. This banking elite and, this cartel, this network kept changing base, and then it kept funding its new base just as Venice funded Holland, and then Holland funded England, and then England funded the US. It's just the capital moving from one place to another. So, the next quote we're gonna pick up is on this page.

Around 1602, the Dutch Republic was already a full blown merchant oligarchy in which the nobility simply played along. In 1602, the Dutch East India Company, VOC, had been established, and that is a huge part of this whole, conspiracy, how, both the English and the Dutch East India companies totally exploded and colonized the world. That was one of the biggest corporations in the world, and it was an outlet for the exploitation of the 3rd world. And this was all coming from the same cult, the same product and network. The new Borscht exchange opened in Amsterdam in 1608, quickly followed by the private bank of Amsterdam, Whistelbank, and that was 1609.

He doesn't say that here, but it all got set up really quickly at the start of 1600s, controlled by an oligarchic elite, which also defined the government's finance policies for a parallel case to Ian Davis on the Private Bank of England Construction. This fusion of the state and capital owners was later spread everywhere and is now the hidden norm in all countries. Very important to note that. Okay. The next quote is here on Page 60.

The fabulous outcome in England, a fake democracy and a serious money system in a budding British empire under their control, was the golden crown on Glaphia's undercover endeavor that had started almost 2 centuries earlier in Northern Italy. Glaphier's bankers were now the de facto rulers of England and soon of the world. But for the first time in history, their serious and other criminal practices were largely invisible to the common people hidden behind a facade of pseudo democracy. The great deceptive and controlling power of the money masters behind the scenes is best illustrated by the incredible fact that until very recently, almost nobody ever questioned this serious money system, neither economists or historians, nor investigative journalists or political parties, not even the most diehard socialists or Marxists, and neither all those lovely people who strive so hard for green and rainbow sustainability without knowing that it is fully incompatible with the Usiris money system. And that's a great point.

And he's gonna get it. He makes that point over and over in the book. And it's we're gonna be talking about that later because this ties into how, not only did the predators use the control of money as their basis, but then they also used mind control, especially in forms of mass mind control and giving people isms and ideologies to believe in. They were always kind of limited. It was like a limited hangout, controlled opposition, fake kind of thing that wouldn't really get them very far.

And so it's it's it's completely true, though. I mean, this this money system, everyone is tied to it, and it is completely unsustainable. It is completely destructive unless you are the the very tiny banking class that controls the money supply. Every mouse gets shafted by it. There can't be any true suspended sustainability with it.

And yet how many people know this? So to tie up this this section, we have another quote here. He just just reemphasizing that the this banking cartel had a problem in Spain with the aristocrats and the Catholic Spanish Empire. And so this is basically why they chose the improbable candidate, tiny Holland. It was groomed and turned into Glaphia's global hegemon.

And then England, bigger and safer than Holland, was being groomed to become the next and most powerful hegemon. Then there's a quote here. Britain is a slave of an international financial block. So right from the start, that's how Britain was set up with these bankers making sure that they had their Bank of England privately owned, and it was untouchable by parliament or the king or whatever. And one last quote for this section.

A very similar process was carried out in England through 2 revolutions running around 1650 under Oliver Cromwell and the other the Glorious Revolution in 1688. Via the new Bill of Rights, the Glorious Revolution introduced a constitutional monarchy, which established a fake democracy controlled by a partly visible and a partly secret oligarchy. And the secret one was the international bankers, mostly of Italian or Jewish origins. The whole system was secured by the foundation of the Private Bank of England in 1694, which would control the issuance of the now USurious national currency and the ever growing national debt. Thus, the government will gradually lose its sovereignty, while the dominance of the bankers in the city of London will be strengthened.

Okay. And, and here and here, I'll just make a quick point. Again, probably a lot of my, listeners and subscribers know this, but the city of London is a separate entity, not just financially, but politically, legally from London and England. It's its own country almost. It's its own jurisdiction.

And they they did the exact same thing in Rome with the Vatican, and they did the same thing in the US with, DC, which is a District of Columbia. These are all separate jurisdictions, separate legal rules. They're not subject to the rules of the rest of the countries that they're in. And that's that's done deliberately so that, this banking cartel can have diplomatic and legal immunity for their crimes. Alright.

So, we're gonna stop, this part here, and we're gonna pick it up tomorrow with the, sorry, in the next video with the 4th thread, which is gonna be how power move from England to the USA. Welcome back. This is Makiya with the Freedom articles. We're continuing on. This is part 4 of the series of the Predators versus the People, a book review, commentary, and analysis.

And we're picking up the 4th thread here, which is where the USA, where America comes into the picture. So after the Glafia network had pumped up Britain and the head Britain served them well, Britain became a massive empire that the world had never seen. It exploited all sorts of, countries around the world, notably India and China, which are now 2 massive countries that are gonna take, play more of a role in the future. But they they totally colonize them. They humiliated China in the 1800 with the opium wars.

They took all these territories all around the world, which later became part of the British Commonwealth. I mean, all all of this stuff that Britain did was kind of a front. It was it was basically Britain was being used. Right from the start, Britain was owned. This the as we saw in the last part, the Bank of England was set up as a private bank in 1694.

Britain only became what it was because of the influx of capital, because they wanted this, kind of fake democracy capitalist system because it suited them. This is a shocking thing to think about all these historical movements and events and histories and the rise and fall of empires and civilizations and nations. It's there's so much more to the story when you

understand, the force behind it. So picking up, this this one. The US had been a glazier project since its birth in Jamestown 1607 and possibly earlier since Columbus's voyage, which they knew about, fully knew about c part 2.

The American Revolution was a third in a series which is vaguely announced by the insider Disraeli senior. International Freemasonry and the British East India Company, both glazier proxies controlled by the city of London, were major actors in molding the US. During the 1776 American Revolution, a charade according to Jerry Freasier's book, Toward an American Revolution, radical elements of the British Whigs demonstrated demonstrated support for Washington and his armies in the field without experiencing official penalty or sanction. These wigs adopted as their party colors, buff and blue, and would wear pieces of cloth in that color visible on their person. Buff and blue, of course, were the colors of Washington's army uniforms during the revolution.

Again, little has changed, but today, the same kind of people use yellow and blue with Boris and Rishi in the lead. Alright. So let me just stop and explain that. Buff means, kind of a, like, a very light brown or tan, almost like a yellow. So buff and blue could be interpreted as yellow and blue.

And the reason why the author, Miese, is saying this is because, we're over 2 years past the beginning of the Russo Ukraine war, which kicked off in, February of 2022. It's now July of 2024. And when that first happened, and actually for, like, a good year or 2, it's only just kind of stopped recently. The the Zionist mainstream media and all their all their proxies started getting everyone to put little Ukraine flags all over their social media, over their house, all over their websites. And even though probably a lot of Americans can't even point to Ukraine on a map.

And so he's talking about how Boris Boris Johnson, former prime minister of UK, and Rishi Sunak, also the former prime minister of the UK, were wearing dutifully wearing the yellow and blue lapel pins and colors. But, you know, that's just they were told to support Ukraine, basically. But even even back then, the point is that there there were parts of the British class that were deliberately supporting the American Revolution because it was a planned thing. There there was an element of it that was planned, even though there was a spontaneous uprising too. And there were people, obviously, that genuinely wanted freedom there.

That's went up denying that. But, it it's not it's not that it's just a 100% natural and organic, that this movement in the in the colonies to create a new country, that there was definitely, an element where they were steering it towards this because they wanted to create a new country, for the next phase of their empire. The split with Britain was planned as temporary to aid in the preparation of the new hegemon through another republican experiment after the ones in the Italian city states and Holland. So the same patterns of the English revolution appeared again in the American version. Glafia controlled foreign invest involvement and financing and the installation of effect democracy.

But why did the Glaufia controlled central bank not quickly arrive at the American scene? That's in part because the Americans were greatly appreciating their colonial scrip, an example of honest interest free fiat money according to a quote described at freemason Benjamin Franklin. In the colonies, we issue our own paper money. It is called colonial scrip. We issue it to pay the government's approved expenses and charities.

We make sure it is issued in proper proportions to make the goods pass easily from the producers to the consumers. In this manner, creating ourselves our own paper money, we control its purchasing power, and we have no interest to pay no one. The Private Bank of England, of course, sought to end this honest money because nothing reached their vaults. Yet for more than 130 years, the newly formed federation fiercely resisted Glafias many attempts to establish a foreign private control, foreign controlled private central bank. See Thomas Jefferson's remarkable prophetic words, which after 200 years now have come true.

I believe that banking institutions are more dangerous to our liberties and standing armies. If the American people ever allow private banks to control the issue of their currency, these banks will deprive the people of all property until their children wake up homeless on the continent their fathers conquered. The issuing power of currency shall be taken from the banks and restored to the people to whom it properly belongs. And yet so many people don't understand that point. People just understood that the world will be completely changed.

And so if it's one thing that you need to take away from this video series and this book, and I I do heard people go out and buy this this book. It's only \$25. Please support the author. It's a brilliant book. It's that we have to understand this this mathematical scam of how they're siphoning money into their vault, into their coffers and making everyone else poor.

Yet in 1938, after several fatal attempts, enough people were finally bribed and blackmailed. And by another coincidence, some opponents drowned with the Titanic to allow for the foundation of a US Central Bank, the Private Federal Reserve Bank, the Fed. Already in 1952, Eustace Mullins commented, the Federal Reserve System is not federal. It has no reserves, and it is not a system at all but rather a criminal a criminal syndicate. So yes, unfortunately, they eventually got their bank despite Thomas Jefferson, despite Andrew Jackson, and the rest is history, as they say.

But there is an important point we need to make about the US. With the other empires so far, basically, they got abandoned and destroyed. So Spain fell from grace. It kinda went down into just an ordinary country in Europe, definitely not even in the top 3 or 4 most powerful countries in Europe after being an empire. Holland, same thing, not a particularly important country in Europe.

England still has some power. But what they wanted to do with the US was they were looking ahead now, a long way ahead, like 50, 100, 200 years ahead. This cult plans long term. And so they realized that after they were gonna pump America up and then destroy America and

move elsewhere, They were gonna need to do a few things first with America, and they were gonna need to basically make up with Britain and make this connection. And so people wonder, like, why the US and Britain have such a special relationship after the US broke away from it and declared a war of independence, all of us?

Well, again, it's because it's not really the US and Britain. It's this secret network that's controlling it. They wanted the US and Britain to be, friends, the best of friends of this special relationship because they needed them to work together for the next stage of their plan, which was to start to tackle Eurasia. There were lots of empires in Eurasia, starting with the Chinese, the Indian, the Russian, back then the Ottoman Empire, the Habsburg, the the the whole Prussian, German, Austrian, Hungarian. So they needed to break those up, and the US itself wasn't gonna be strong enough to do it.

So they needed to attach it to Britain and get some other European allies and start cracking the nuts, start destroying some of these Eurasian empires. That's the only reason why they did it. So, this when we go on to the next thread, the US is still the world superpower now. But we're living in very interesting times because the US has been declining actually quite rapidly in the last 5, 10 years. And so what's happening is power is moving east.

I've done videos about this. It's obvious now that they're pumping up China and Russia. They are gonna be the next, leaders and and the next home base for this cult. And so they're gradually moving power away from the US. And so let's let's take a look at, how this kind of plays out and what the planning is behind this.

So we're gonna go to this page here and look at this quote. Okay. For their enormous Eurasia project, the now Rothschild led banking syndicate, a fresh embodiment of the old Glaufia Anno Domini 1522 project required a very large and strong proxy force. Firstly, the British Empire had to be strengthened further and prepared for war. Secondly, the USA with its tremendous potential had to be prepared to become Glaufia's 4th hegemon in the 20th century, but that wouldn't suffice.

After the plan to Peru split in 1776, the US had to rejoin forces with the British Empire. While reinforcing the proxy powers just mentioned, at the same time, the great Eurasian Land Empires, Ottoman, China, Austria, Russia had to be preweakened. For more details on planning, CA 5.4, then the territories of Germany and Italy were still crumbled and had to be consolidated as normalized clafier states under banker supervision. Japan still closed to foreigners in 1953, had to be opened and had to be armed to be used as glaufier's battering ram in Asia. And during all these 19th century preparations, Europe had to be kept as quiet as possible through the balance of power.

So this is a very, very long term and cunning plan. And we're talking about countries being used as chess pawns, as chess pieces on the board. I mean, this is it's incredible, the kind of power that they've amassed to to to play with the whole world like this. After the defeat of

France and Napoleon in 1815, the Rothschilds invited all European rulers to assemble at the Congress of Vienna. They presented a plan for a supra European body to prevent the rise of another European power by creating a balance of power sometimes called the Concert of Europe.

Any power revolting against the new order controlled by the British Empire and the Rothschild led banking syndicate would be attacked by all the others. And, of course, the ever growing debt of the European nations could be used as a lever. The plan failed because Tsar Alexander 1 of Russia saw through it. There's a rumor that the Rothschilds became so angry that they vowed to destroy the Tsar's whole family, which indeed happened through Jewish hands in 1918. Already in 1815, Russia created a holy alliance with Prussia, pre Germany, and Austria, which was renewed by Bismarck, leader of Prussia Germany in 1871.

So a more radical approach was needed. The only solution would be a big war, a world war, which was going to be staged by Glafias Anglo American Zionist proxies. So this is what they were contemplating considering, when the US was being set up. It's around late 1700 to 1800. Okay?

And we're gonna check this quote out. Very important. At the time, Germany was not yet a political or economic menace, although it was a spiritual opponent to British and American materialism. But under Glafier born Bismarck, the bankers would pop it up in such a way that it was seen by the British as an economic and military threat, a justification for war. Exactly a century later, a similar trick would be pulled on China, which is now coming to harvest.

The biggest difference is that Glaufia earmarked Germany for total and utter destruction and China for full blooming as Glaufia's new global hegemon. So they basically needed to stop Germany and Russia joining forces. That was really the only thing that was gonna stop this plan. There were a lot of other alliances that didn't bother them, but they needed to isolate Germany and pick it off and then, eventually set up this cold war with Russia. And and then at a time, you know, it became where it became the Soviet Union, there were plans to integrate it with the US.

Then then they chose a different path. But the plan was never to kind of defeat Russia right from the start because Russia is so huge. But they were gonna defeat Germany and and, but they had to pump it up first. So all of this was done in advance. This is why they they built united all these German states into one country, build it up, funded it, did the same thing in World War 1 and World War 2.

Actually, Germany was a loser in both wars and until basically just subdued it now with American military bases occupying it. And, that way, they basically move their empire from, the the base in the west, in the US and England, moved it further east by taking and and look at NATO today. NATO is now incorporating all these different countries. This is this is the

Glafya project in in operation as we speak, taking in Poland, taking in all the Scandinavian countries, taking in the Baltic states of Lithuania, Latvia, Estonia, trying to take in, you know, everyone they can. I mean, they were trying to take in Ukraine.

This is these geopolitical wars and, alliances and maneuverings that we see right now and have seen in the last 5 or 10 years is the outcome of all of this planning that was happening in 1800. It's it's it's incredible and staggering, but the evidence is in this book and other books, and the evidence is very powerful. So basically, we are in the 5th stage of the transfer of power from the West. First, Spain, Holland, England, USA to the East, Russia and China. So I'm gonna stop this part here and we'll continue on with more in the next one.

Welcome back. This is Makiya with the Freedom review, commentary and analysis book by Mies by Ayen. Wonderful book. Brilliant and amazing clarity of thought. So we were talking at the end of part 4 about the 5th stage of the transfer of power.

And this is the stage where they're going to start taking power away from the west, especially America, and transfer it to the east. And why do they wanna do that? Well, because China and Russia, but especially China, is their model. David Rockefeller said so. They don't care how many lives Jan and Mael killed.

That's the kind of future they want especially when you consider the advance of AI and technology because China is not just communist. It's technocratic. They want a system that's ruled by machines, where people have social credit scores, where they track 20 fourseven, where fines and fees and taxes are automatically deducted from their bank account where there's little anyone can do to revolt or protest. That's what they want, and that's why they like China for their model. So that's why they're in the middle of transferring the power back.

Now before I start taking quotes from the book, I wanna say that I have been talking about this in recent videos. I did a video called Elevate the East to Grade the West, the direction of the new world order because it's clear that the power is being moved back to the east. With everything we're seeing, China is surpassing the US in all these different markers economically. It's gonna be surpassing it militarily soon, and it's gonna be set up as the leader. And just a warning for people in the alternative media, especially that want to think that Russia and Putin is some kind of antidote to the new world order.

He's not, and Russia's not. They're doing the same kind of things that they're doing in the west. You just don't always hear about it. They're banning VPNs, which are the virtual private networks that allow people to have more anonymity and privacy online. Russia is building 15 minute smart cities as well, and Russia was totally in lockstep with all these tyrannical dictatorial nations during the COVID's pandemic in terms of enforcing masking and lockdowns and vaccines, vaccines, and they, you know, they have their own sputnik vaccine too.

So Russia's not the solution. They're part of the same cult. They're part of the network. They're controlled as well. So very important to keep this in mind.

But let's go back to this book. So Mises writes, after earlier cycles of this domination project with Spain, Holland, England and the USA as Western hegemony, Glafia's new global leader states China and Russia, both groomed since decades, are now taking the baton or the baton over for the 5th cycle. The current shift, the first from the west to the east, is carried out under the cover of military and germ wars and a new benevolent multipolar world order while the still deceived and dormant west is being demolished. And so you have to be really careful about this benevolent multipolar world order stuff, especially when you have countries like Russia and China that are not exactly renowned for their respective unalienable rights of human rights, of individual liberty, that they're going to be leading small di polo bolo. So don't expect that it's going to be giving you all these rights.

So this is the game plan, and this is the time that we're in. So it's especially important we wake up, and we pay attention to this. I'm going to give you another quote now. The phenomenon of the simultaneous decline of Venice and the rise of the Dutch will repeat itself during the next cycle changes from Holland to England, from England to the USA, and presently from the USA to China, each time on a grander scale as described in detail by Arian. Another occurrence during the cycle changes is war.

After the 80 years war, 1568 to 1648 and the simultaneous 30 years war, 1618 to 1648, Habsburg, Spain lost its primacy and Holland became the regional and then global leader with Amsterdam as the financial capital of Europe. And so it was that during the 18th century, Holland had to gradually relinquish its primacy to England which ended when it came under French occupation during the Napoleonic wars. Thereafter, the city of London became the new financial center of the world. In the first half of the twentieth century, the world wars would seal the fate of the British Empire, and the USA would take the baton, the baton become the new creditor of the world with Wall Street and the Fed dominating global finance. The war in Ukraine is presently marking the change from a uni to a multipolar world order, which is the 4th change of cycle in the glafia project now from the USA to China slash Russia.

The American dollar is still the main reserve currency, but the timer attached to the bomb under it is ticking fast. And so we just saw huge news earlier in this year in March when China brokered a deal to help Iran and Saudi Arabia get back on the same team because they want them as part of the Eurasian empire, whether it's part of BRICS or the SCO, which is the Shanghai Cooperation Council or any all these other alliances and groups. Some of them are just economic. Some of them may become military. Some of them are already military.

So this was just another kind of, significant event which pulled Saudi Arabia out of the US orbit back into the Chinese orbit. And similar things like that will happen in years to come as the power goes east. So let's, shift gears now and talk about something else in this book that's also very important. And that is this whole thing about decolonization. So there's a lot of deception around this because it has been celebrated throughout the world that when America or Britain give back one of their colonies, people are like, yeah, look at this.

Like, it's freedom, you know, independence, self determination of peoples. Of course, not self determination and sovereignty of small nations and peoples is important. But that's not what's really going on here. This is another one of these scams where what is on the surface, is deliberately looking different than what's really going on. So, we we gotta be careful because what's happening with this decolonization deception is that the power is moving from overt control to covert control.

Let's see what Meese writes about this. We already saw how Catholic Portugal and Spain were sidelined from their global roles which was undoubtedly related to their expulsion of the large number of Jews at the end of 15th century and more in general to their anti capitalist and anti usury stance. That's why Glauflia chose to go ahead with the protestant, Jew, and usury friendly Dutch and Brits. When France under Napoleon also made war with Spain, an even stronger power vacuum was felt in the American colonies. Finally, in a series of revolutions from 1808 to 1826, the 5th in the Israeli series, Spain lost all of its American colonies except Cuba and Puerto Rico.

Portugal's largest colony, Brazil, became independent in 1822, but its African colonies have to wait until 1974. Officially, North American and British sympathy for an independent Latin America was grounded in the belief that the wars of independence reflected ideals of freedom and liberty. Please allow me to allow the newly independent nations in Latin America instead of provinces of the still strong Spanish empire would not only create many commercial benefits for the US and UK. By ending Spain's trading monopoly, secure investments and the extraction of wealth would suddenly become possible. It would also allow the recently independent USA to organize its southern backyard by installing subordinate elites, which will be paid off richly by for selling their country's resources cheaply to the US, and so it happened.

The much hyped independence was simply an informal neocolonization. In the 20th century, that would also become the fate of all African and Asian ex colonies. Yeah. Sad to say it, but that's that's what happened. I mean, if you're not sure if you doubt this, look up the Monroe doctrine, which basically was the US grounding itself the right to colonize, neocolonize and take over all these countries in Central and South America, and Europe was not to interfere with it.

So, one last quote here to bring this point home. In the Americas, Latin America had just been decolonized with an important role for glaufia controlled free masonic societies, or in more correct terms, brought from weak Spanish rule to stronger and stronger glaufia control via manipulations by the British Empire and later also by the USA. So the decolonization deception has run throughout history, and one thing I really like about this book, The Presence versus People, is it clears up what was really going on with these movements and events. We thought they were about one thing, and maybe they were partly they were on the surface, but they weren't really underneath. There's this deeper drive, this deeper organization and motivating force, which is really directing what's happening in history and usury and private banking, they they got the power to do all of this.

And and usury and private banking, they got the power to do all of this. And they're incredibly evil and psychopathic. And they are very forward thinking, planning stuff out, not just decades, not just 50, not just 100, more than 100 of years sometimes. And Mies doesn't get into this in his book here, but this is in turn because this banking cartel is controlled by a nonhuman force. But that is beyond kind of the scope of what I'm getting into with this book and this video series.

So we're gonna leave part 5 here, and we will pick it pick it up in part 6. Thanks for watching. I'll see you in the next one. Welcome truth seekers and freedom lovers. This is Makiya with the Freedom articles, and this is part 6 of a multi video series of Predators versus the people, a book review and analysis.

We're gonna pick up here by looking at a little point here about whitey. So they used white people, glaufia. They they basically colonized Europe, and they hid behind white people to carry out a lot of massive colonization and crimes around the world. Now have a look at this paragraph. The privileged treatment of Glaufia's western proxy nations during the last 400 years was just a confidence game for at least two reasons.

First, the European nations they controlled, and later the USA too, had to subdue the rest of the world as to gain control over all lands, starting with the low hanging fruit in the 3rd world, and second, in a later stage, to further develop science and technology, especially for military purposes and later for digital surveillance of the population as to control all people. During this period, the richer and freer the people in the West became, the more they were controlled by covertly colonizing their minds, mind control and mental side, and hooking them on glaufia created ideologies with climatism, workism, and transhumanism on the menu of our days. So this part 6 of the series, my analysis, is going to be about ideologies. But I wanted to start off with this point because it's it's very easy for us to buy into this whole white guilt thing where basically we're looking at this this satanic cult and this banking, network. It's 1 and the same thing and and how they've treated the world for 1000 of years, but at least for 500 years.

And basically, because they've recruited a lot of foot soldiers in the European countries with the colonization, recruited then basically, the rest of the world has then looked at white people as, hey. You guys are thieves, rapists, scoundrels, etcetera. And, yes, some some white people are, but a lot of white people are not. And they they don't they're totally embarrassed and ashamed of this, and they don't want any part of it. They don't they don't wanna colonize other lands and steal from other people.

But Latvia has been out of use this against them with all this, mind control and and propaganda and ideology that's going on because then they basically introduced this whole thing of white guilt and making white people feel ashamed for their privilege when in the end, yeah, white people have had a higher standard of living. That's true because of because of all this. But it's the driving force of this usury and this private banking has been what has been behind all of this theft and colonization and everything, and that's really the source of it. And so they're basically just using anything they can to basically hide hide their own responsibility and get other people to pick up the tab. But I really wanna focus now on this part on ideology because this has been an incredible way that they've controlled people by introducing isms and ideologies, and all of them are limiting.

All of them are deliberately designed to narrow your perception in one way or the other to box you into some cul de sac or corner. And often, they actually create opposing ideology, so you can fight it out, and you can create these these pairs of opposites, these false dichotomies or false binaries, and then just get people really, riled up against each other and to the point where they actually hate and kill each other. But notice that the the binaries will always have one thing in common. They won't ever shine the light on usury or private banking or the satanic network behind it. They all have that one thing in common, that they they never really look at the source of who's projecting the image on the screen just like Plato's cave.

So, you know, it's really about controlling people by narrative and by stories and by perception. So after the Renaissance or the Renaissance, the Western world underwent rationalization, intellectualization, and disenchantment. The spiritual was suppressed. They knew they had to give people something to believe in. And so there's a great quote here which says that, here it is.

After religions, ideologies became the new opium for the people. So far, all new opium has been courtesy of Latvia. And so just to give you an example of all the different isms that they've they've managed to create, I mean, they they basically destroyed spiritualism or suppressed it. They promoted materialism and atheism. And then they set up things like capitalism and communism, Nazism, Zionism, socialism, feminism, the New Age Movement, climatism, CRT or critical race theory, wokeism, woke ideology.

Transgenderism, of course, is the current one, and that is the on ramp to transhumanism. So all these isms to fill people's minds and divide and conquer, and none of them are actually targeting what is really the source of all of this. And, you know, a lot of them have dual functions or triple functions. In the case of feminism, this is to pit women aggressively against men. It's not to have women actually be embodying the divine feminine, which would be a beautiful thing.

No. It's to get women into the workplace, to dissuade them from having kids and small population control, to get them tired out and fighting with men and all of this stuff. It's interesting. There's another quote here which talks about what underpins all of these ideologies. Is there is there, like, a common factor that I haven't already mentioned?

Well, yeah, this is a good quote about that. Lastly, according to Kevin Barrett, all modern all modern ideologies have something in common, which chimes in nicely with the message of destruction of all traditional values and the old order by Nahum Goldman in 1915. This unquenchable thirst for destruction, call it nihilism if you will, is the engine of all post religious political ideologies, be they of the left or the right. Socialism, anarchism, communism, fascism, Nazism, wokeism, all share a barely concealed urge to blow up the inherited social order, ostensibly to rebuild it as some sort of nebulous paradise on earth. But all those rebuilding plans are just window dressing.

It's a destruction. Only the destruction that counts. So that that is a very common theme that underpins a lot of these Glaphia inspired ideologies. Glaphia's present endgame can be concentrated at the implementation of a system for the individual control of human beings, this time by technology. Control by ideology will gradually disappear as the Digistopia's new and extremely effective totalitarian system will drastically detect and eliminate all dissent and thus the need for any ideology, if we allow them to do so.

So, yeah, that's that's where they're going. They've used private banking, usury. They've used ideology, which is kind of like mass mind control control of perception, and they're on their way to wanting to use technology as the main way to control people in the future. So whether they can get away with that or not remains to be seen. Here's another point about the ideologies.

Galapia's promotion of atheism, nihilism, relativism deluded many Westerners, especially leftist intellectuals, while taking away all purpose and meaning from them. Galaffia then filled the void, also called the God shaped hole, with deceptive ideologies often defended with a remarkable religious fervor from Marxism, Zionism, and consumerism to climatism, LGBT plus always in support of their plan to steal our planet, freedom, and future. Even ideologies and isms that people might think of as good, such as capitalism or liberalism, they're all designed to lead us astray. I like this quote here. Brattle often stressed another essential aspect.

Capitalism only triumphs when it becomes identified with the state, when it is the state. Today's glauflia domination project is so advanced that its capital in banks, asset managers, and corporations controls all nation states, big corporations, and national and international institutions. A century ago, Oswald Spengler and the decline of the West went already further than Brad Dahl ever would. Western democracy is the political weapon of money, and the mass media are the means through which money operates democracy. So yeah, democracy is just a front for this as we've already explained.

When plunder becomes a way of life for a group of men in society, over the course of time, they create for themselves a legal system that authorizes it and a moral code that glorifies it. Yeah. So the legalism the legality and the morality comes after the the pure desire, in this case, the desire to steal and to control. That legal system exists now everywhere, and the glorifying moral code was a fairy tale that capitalism equals freedom, as in free trade, free markets, free enterprise and neoliberalism. That's a total myth maintained by a great army of proxies: economists, historians, Harari included, social scientists, lawyers, educators, journalists, and politicians.

Note, liberalism is in fact the political ideology behind Glafia's capitalism or, more correctly, behind its domination project. As COVID and many other events have shown, it is as fake as all the other ideologies promoted by Glafya. So another really important point with this is that we keep hearing about how good capitalism is. But do we even really have such a thing as capitalism? Because what it seems to me that we have in the West is we have a kind of capitalism where the rich privatize their profits, but they socialize their losses.

And this can be seen in the 2 big to fail banks and corporations. So they basically gamble with people's money, and then when they look like they might, go under, the government comes in and rescues them. But it doesn't do that for any medium or small businesses. It only does it for these like giants. So they basically can just gamble without any real risk.

Alright. So let's move on to this one here. Capitalism, liberalism are the fig trees of the Glauflia project with a hidden embrace of capital and the state as its top secret. Okay. And then to wrap this up, I want to move on to talking a little bit about the Marx the Marxism and stuff that came from the Frankfurt School or the Frankfurt Schuler in German.

It wasn't just a school but a project that started in the 1920s just after the First World War in Weimar, Germany. Big names were Marc Hughes, Horkheimer, Adorno, Habemas Habemas, all Jewish. So they had to move in the 19 thirties, and they went to the US. Their critical theory seeks to liberate human beings from the circumstances that enslave them, to reveal the ideologies of the mechanism of power and oppression, and also to gradually and it was and it was coined political correctness. Yet these men were insiders.

And like Marx, they must have known that a global domination project was going on. In the roaring sixties, with the Frank Patchula assisting in the rollout of sex, drugs, and rock and roll era, the flower power came to Biden rule feminism, the promotion of homosexuality and transgenderism all under rainbow flags, also weighed by Glafias Big and Dirty Corporations. The woke slippery slope has no end in sight. The fact that children are born as male or female is now even seen as an oppression by nature. So puberty blockers are needed until they can decide their sex or any mix of sexes for themselves.

So, yeah, so they take this oppression thing and they just bring it to the extreme where it becomes nonsensical and ridiculous as, and that is really the definition of the woke ideology. It is just nonsensical and ridiculous. So that all comes from the Frankfurt School where they dreamed up these ideologies again because they were on the bankers payroll. They did everything source of oppression. And they basically just hijack this word oppression and set one class against the other as, you know, ad infinitum, as much as they could to get people fighting with each other and never looking at the real problem.

Okay. We're gonna end part 6 here, and I'll see you in the next one in part 7. Welcome truth seekers and freedom lovers. This is Makiya with the Freedom Adicals, and this is part 7 of my multivideo series series the Predators versus the People book review and analysis. Okay.

We're gonna pick this one up talking about the rise of Hitler. So did you think that this was just an organic thing that Hitler somehow just came into power like that? Well, no. There's unfortunately nothing that seems to be organic and random in our history, nothing that's really important. It all seems to be planned out, sometimes with a lot of machinations and deception in the background.

So let's pick it up with this quote. American intelligence, captain Truman Smith, spotted and interviewed Hitler already in 1922 and decided that he would be the charismatic leader of the World War 2 project, their boogeyman in an enormous glaufia protection racket. For 15 years until 1937, Hitler was groomed, financed, and protected by art dealer Ernst Hamp Stengel, an an elite American, regular visitor of London, and and his friend FDR in the White House. Hitler was a project of the Anglo American bankers, although he was a dupe, not an agent, Jim McGregor. Also in the early 1920s, Krupp engineers were secretly tasked with a project to design advanced military equipment for a war 20 years ahead.

During the Weimar Republic's inflation hyperinflation, American companies had brought up Germany's prime real estate incorporation for cents on the dollar, and Germany was thrown in a horrible banker contrived ruin. And you can get, more information on that on the by the excellent, author Guido Preparata, Conjuring Hitler, How Britain and America Made the Third Reich. That and the communist threat secured Hitler lots of support, both from industrialists and the desperate masses. Yet he never won more than 33% of votes. The great powers, including Stalin, could easily have stopped him but allowed him to go east via the annexation of Austria and Czechoslovakia to literally pave the way for an attack on the Soviet Union.

Hitler largely faked his anti semitism. Both Nazism and Zionism wanted a racially clean state. Most, mainly half or quarter, Jews were part of his organization. Brian Rieke, Hitler's Jewish soldiers. Hitler never named the Jewish bankers, allowed major Zionist opposition activities, and strongly backed the Havara migration project for rich German Jews.

Meantime, he prevented that the Orthodox and poor Jewish schnaures, so despised by the Rothschilds, would go to Palestine. They became special targets in the concentration camps, at some point, even persecuted and mistreated by planted Jewish couples. So for the background to this, check out a video I just did called the heart of our agreement and the Zionist Nazi collaboration. It's a very, very important theme to understand because you'll realize that the Zionist and Nazis were collaborating right all the way through before World War 2 when Hitler came to power. During that period from 1933 to 39, they were collaborating and during the war as well.

So the the key Zionists didn't care about the rest of the Jews. They were fixated on, establishing Palestine no matter what, And they were using the anti semitism that was funded into existence, with not, well, not, not just the anti semitism, but Hitler and the rise of the Nazis was helped fund it into existence. And so they use that wave to generate sympathy to help create Israel. It was all planned out. So, it's it's again, just very important to understand that there was no German economic miracle.

See see the work of Anthony Sutton. The Nazis were funded. This was all done by Glafya. They were building up Germany just as they they built up Russia to create opposition, and then they were going to destroy it. And and unfortunately, German Germany has become that now with, has had American bases in it ever since it lost World War II.

Let's move on to Zionism. So basically, I have talked a lot about Zionism in my previous articles, videos and books. But just briefly here, the Zionist movement was hijacked by the Rothschilds who indeed had a far reaching plan. They were horrified by Herzl's idea to bring millions of schnoras, usual Jewish eaters, to Palestine. Only the young and fit could migrate.

The aged and infirm would have to accept their fate by Haim Weitzman, 1937, to be greased for the wheels of the Jewish state. One reason why the Rothschilds would finance Hitler was to solve the problem of the schnores they so despised. The land and not the protection or survival of the European Jews became the single goal. One cow in Palestine is worth more than all the Jews of Poland. And the more slaughter, the easier we'll get the land by Grunbaum, 1948.

So this was the real motivation and thinking and mindset of the top Zionists that were pushing for the creation of Israel, which was the theft of Palestine. They didn't care about Jews and ordinary Jews have been used all along as a lot of people have been waking up to.

So that's a little bit on Nazism and Zionism and how Glaviyo was kind of behind that. Let's jump now to just kind of wrap all of this up. And I want to talk about the glavia template for each nation.

So basically to summarize all this, this is what they do. They've been moving around as this book tracks for 500 years. And so basically, they when they go to a new place, they set up a legal system to guarantee the protection of private property, a financial system based around their private central bank that they own issuing the state's money, and the government, enforces that by force that it's legal tender and it protects, you know, things they have to worry about, like a run on the banks, because that could totally destroy the whole system if people lose faith in it. So they can just declare bank holidays or shut stop people from doing that. Then an economic system, monopolies with narrow connections to the state.

So state government monopolies and a political system, a fake puppets on a string pseudo democracy kind of system. This is the this is the template. It's worked very well. And, of course, none is so hopelessly enslaved as those who falsely think they are free. And that's the kind that's a quote from Goethe, the German poet.

And that is basically the kind of system that or the mindset that has led them to set up all these western democracies and western republics and all of this. But ultimately, you know, they are hiding behind each nation. That's what's really important to realize. It's another whole way of looking at history. Glafias corps was, of course, always out of sight and above the law.

They never appeared in any trial and weren't even mentioned by the court historians. After World War 2, the partisan Nuremberg trial only processed proxies and useful idiots on the size of the losers, cleverly called Nazi fascists. It was just a distraction to shield the real perpetrators. Excuses or compensations for crimes of slavery or colonization centuries ago may well have the same goal. In the end, we, the common people of the West, East and South, black, white or any color in between, were all victims of this same archfascist domination project although in different ways.

Unfortunately, few people understand that we've all been fooled. The people in the south still think it was the Dutch or the French or the British white people who colonized and enslaved them as critical race theory claims. The people in the West still think that the German and Japanese people caused the great 20th century slaughter of Eurasia. Yet in all these crimes, glaufia was the driving force and financier, without which these operations could never have happened. If it's one thing I want you to get from this, series and this book, that that is it.

We've been looking at the wrong place. These this network is incredible with its deception of being able to cause all this absolute strife and chaos and hide behind it. And so ultimately, to wrap this up, you know, what do they do? Well, they make, tear down, and remake the world as they see fit. The new world order motto is autoabcao in Latin or order out of chaos.

This book describes the way that they continually moved and created new countries and governments to suit their agenda. Now they're aiming for world government, so they have absolutely no qualms in tearing down and destroying all nations to make way for a dictatorial totalitarian one world government. And so to finish off, we would best, I think, look at the quote by Lord Acton. The issue which has swept down the centuries and which will have to be fought sooner or later is the people versus the banks, perhaps the only real division that matters when we're talking about the entire pattern of human history. So my observations on this book it's a brilliant book.

It's especially noteworthy for its clarity of thought. It digs beneath the surface to highlight the real movers and shakers of history, the real causes of historical events, movements, and patterns. So Mies Baoyagen has done an amazing service to humanity with this book. Please go ahead and get it. I do have a couple of points of constructive criticism.

First would be that it covers only 500 years, but really, the story didn't didn't just start in the year 15/22. It could have covered 1,000 and 1,000. I mean, a lot of people have traced this stuff back to Egypt, to the Middle East, and maybe even further. Number 2, it doesn't touch upon satanism explicitly. I mean, it just calls the group, this banking cartel evil and satanic, but it doesn't actually, make the connection with, what they're what they're really doing, which I have done in my book, the International Satanic Network Exposed, because this group is the same group that conducts satanic ritual and gets victims, mind controls, and turns them into sex slaves and assassins and all of this.

It's the same group, same bloodlines. So it doesn't get into that. Number 3, it barely touches upon ETs, extraterrestrials. There's a tiny bit on UFOs. That's important as well because that's that's another big part of this story.

It it's that's beyond kind of the scope of this book. But if you're looking for that, obviously, there are a lot of people who've covered the extraterrestrial connection to the new world order. Start with David Icke. Okay. I'm gonna leave, it it here.

That wraps up this 7 part series. Thank you for listening. I hope you got something from this, and, I hope this can help change the way that you see the world for the better. As always, don't take my word for it. Do your own research.
